# About Ruby Tuesday

Ruth

This is what can happen when two friends who are passionate about children's books and education decide to start a publishing company.

Take a look around!  
We hope you love our books

Shan

**Ruby Tuesday is owned and run by best friends and business partners Ruth Owen and Shan White. We are predominantly a non-fiction publisher with a passion for science and conservation.**

Almost 10 years on from Ruby's small beginnings, we have now published more than 200 titles for children ages 0 to 16 years. And today, our books are being enjoyed by young readers from the United States to China, and Denmark to Australia.

Looking forward, our notebooks are stuffed full of new ideas for 2024 and beyond, and we can't wait to see what the future brings!

## Why Non-Fiction?

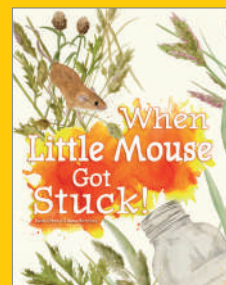

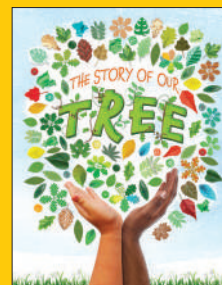

We are often asked why we chose to start a non-fiction publishing company. To answer that question, we actually need to go back quite a few decades. . . .

When Ruth was just six years old the first book she ever chose for herself from a school bookclub magazine was a non-fiction title. The book, **Gorilla Baby: The Story of Patty Cake**, still sits on the office bookshelf today. It has inspired a life-long love of non-fiction reading and a passion for animals, nature and science. When deciding what types of books Ruby Tuesday would publish, the choice was easy: **beautiful books to help children discover that real life and facts can be every bit as exciting and engrossing as fiction!**

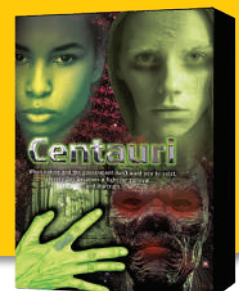

## Exciting New Developments

In the past two years, we've had enormous fun developing new projects.

Our range of science and conservation themed picture books have been a joy to create.

And our desire to help all young people become readers, powered the development of our ground-breaking Hi-Lo fiction series for teenage struggling readers, **Centauri**.

## Having a Baby How a Human Life Cycle Begins

978-1-78856-201-0

This exciting addition to the hugely popular FUNDamental Science series gives children a fascinating and accessible look at how a human life begins. The topics of conception, IVF, pregnancy, birth and a baby's first year are explained with lots of science and lots of sensitivity.

The book also includes critical thinking questions, discussion topics and activities to help kids understand the subject matter and explore their own life cycles. It is also perfect for use in Relationships, Sex and Health Education lessons.

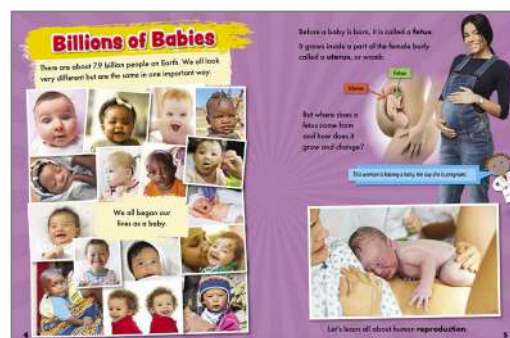

The download button on a page shows there are free resources available from the FUNDamental Science website. Go to: [www.rubytuesdaybooks.com/scienceKS1](http://www.rubytuesdaybooks.com/scienceKS1)

## Earth's Insects Need You!

978-1-78856-323-9

Earth's insects are in trouble. That's one half of this book's simple but incredibly important message. The book's other, more hopeful, "call to action" is that everyone can do something to help protect bees, beetles and thousands of other insects.

Without insects, many animals, including birds, amphibians, fish and reptiles could not survive. Humans would struggle to grow enough food and decomposers would not be at work recycling dead plants and other waste materials. However, it's estimated that, worldwide, insect numbers have declined by around 75% in the past 50 years.

In this book, readers will learn how the destruction of wild habitats and the use of pesticides is affecting insects. They will learn what we can do as consumers and campaigners. AND they will discover how to create wild places for insects.

This book is perfect for young conservationists who want to improve our world and ensure a healthy future for the smallest and most endangered members of the animal kingdom.

## SPIDERS

**We're Not Scary We're Amazing!**

If you love spiders, or if you are terrified of spiders, or if you just want to be mind-boggled by some incredible arachnid facts, this book is for you!

978-1-78856-324-6

These little eight-legged creatures are often the stuff of people's nightmares, but spiders are amazing animals that are essential for our world. Told from a spider's point of view, in this book, spiders set out to convince their human doubters that they really aren't out to scare or harm people. In fact, they are far too busy weaving beautiful silk structures, hunting, keeping insect pests under control, and raising their young to want to frighten humans.

### Inside the book:

- Readers will meet some weird and wonderful spiders.
- They will learn how spiders are essential to ecosystems everywhere.
- They will investigate why some people are afraid of spiders
- And they will celebrate the lives of these little animals that so often get ignored or are dismissed as scary.

## The Seasons in Mr Green's Garden

In this beautiful new science series, readers will join the popular picture book characters Mr Green and his friend and neighbour young Mo in their community garden. As each season passes, Mr Green and Mo will discover how the plants change and how the animals that make the garden their home spend their days, find food and raise their young.

These books are perfect for studying plant and animal life-cycles and for building an understanding and appreciation of the natural world and its cycles. This series will also teach children how we grow food and will help to build a love of spending time in nature.

## How To Grow

NEW FOR  
December 2023

We all enjoy these delicious treats, but how do we get from a tiny seed to a jar, bottle, bag or plate of these favourite foods?

Each book in this series is full of bright step-by-step photos and easy-to-follow instructions that will show young children how to grow a plant (with lots of science along the way). At the end of each book there is a recipe to make the foodstuff.

Today, many children lack knowledge about how foods are grown. These truly hands-on books fill that gap and will get little hands both muddy and sticky!

## My World Your World This is Our Faith

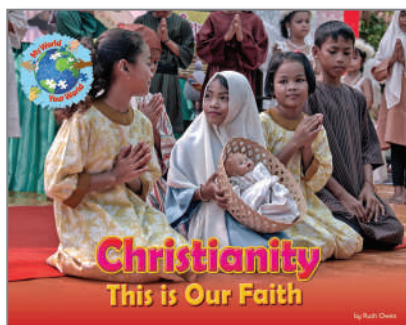

Age Range

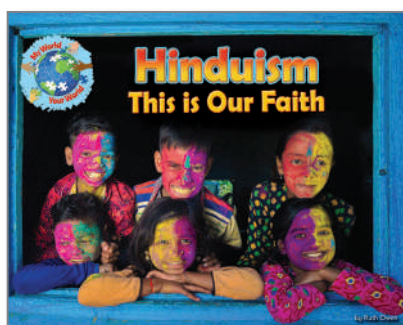

6-8  
YEARS

Each book in these new titles from the **My World Your World** series introduces young readers to the key aspects of one faith and then shows how that faith is observed by children from several different cultures and countries. Readers will discover the core beliefs of each religion and they will learn how children like them worship, observe important rituals and enjoy the key celebrations of their faith.

In each title, the accessible, lively text is supported by stunning photographs. Every book includes a world map showing where the topics featured in the book take place.

## The Story Of Our Tree

This wonderful story which celebrates the planting of trees is packed with information about these amazing plants and why they are essential for our world.

Age Range

5+  
YEARS

978-1-78856-207-2

In this delightful, science-packed picture book, readers will join two groups of young friends as they each plant a tree and then share their excitement through a series of penpal letters. In the UK, the friends plant an acorn and share all the facts about how their oak tree will become a maker of oxygen, a cleaner of the air, a feeder of the soil and a home for thousands of tiny creatures. And in Senegal, in the Sahel region of Africa, the friends plant an acacia tree that will become a source of income for their family and part of the Great Green Wall that will stretch across Africa, protecting the Sahel from the Sahara Desert. This uplifting story will give readers plenty of information about trees and includes a **PLANT YOUR OWN TREE** activity.

## When Little Mouse Got Stuck!

Pbk: 978-1-78856-329-1

But Suddenly, Little Mouse was slipping...

...and sliding...

...and tumbling and...

**STUCK!**

Little Mouse and her babies live in the hedgerow. But one day, something big and noisy and smelly visits their world and leaves something behind. Sniff? Sniff? As Little Mouse investigates a tempting smell, she finds herself, slipping... and sliding... and tumbling and... stuck! She is trapped in a plastic bottle that was discarded by people in a car. How will she ever escape and make it home to her hungry babies? This important story will highlight the dangers of littering and the harm rubbish does to wild animals every day.

# Mr Green Grows a Garden

The first in a new series of beautiful picture books from Ruby Tuesday that explore conservation and science themes.

Age Range

5+ YEARS

978-1-78856-166-2

## Specifications:

- Ages: 5+ years
- Size: 280 x 210 mm
- Pages: 32
- Pbk: £8.99
- Curriculum Links:  
Non-fiction reading, science, STEM

***In the middle of the big city, there was a tired, ugly place that made Mr Green feel very sad . . .***

So begins this uplifting and charming story of the magic that can happen when young people, older people and plants come together.

As Mr Green grows his garden in an abandoned, forlorn space in the city, the following themes are explored:

- How plants grow, including vegetables
- Creating places for wildlife
- Rebuilding ecosystems
- The importance of planting trees
- How soil is a living thing that needs to be nurtured
- The importance of encouraging friendships across the generations
- Discovering how enjoying nature and being outdoors is good for our mental health

## Whose Little Baby Are You?

Key Stage

1

From a fluffy ostrich chick to a tiny, newborn giant panda, this book-banded series introduces readers to some adorable baby animals. Not every baby looks like its parents, so after meeting each little creature at the start of their book, readers will turn the page to discover who the baby animal belongs to. Readers will learn how animal mums and dads care for their young and they will see how each baby animal grows, changes and gets ready for its adult life.

**Whose Little Baby Are You?**

- High frequency words
- Unfamiliar vocabulary supported by images and labels

Up Close With Microhabitats

This title, filled with ideas for activities and experiments, gives young science enthusiasts all the information they need to investigate and do their part to help solve the problem of plastic pollution.

## My World Your World

Age Range

6-8  
YEARS

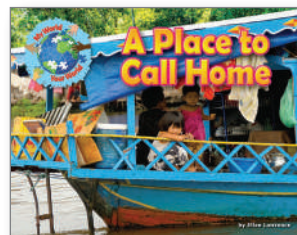

Each title in the **My World Your World** series introduces young readers to the lives of children from many different countries and cultures. The series highlights the diversity of children's lives and also celebrates and examines the ways in which children worldwide are very much alike.

## The Secret Lives of Insects

Age Range  
**7+**  
YEARS

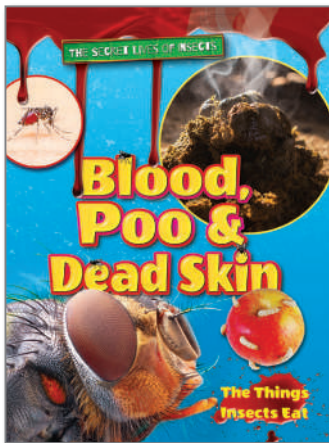

The lives and habits of insects can be truly incredible. Some, however, are so gross you probably won't even want to read about them. Oh... You do?

Each book in this new series is packed with truly unbelievable facts about some of the smallest members of the animal kingdom. From wasps that turn cockroaches into zombies to help them take care of their larvae, to beetles that repel predators with stinking, poisonous, boiling-hot farts.

## Science Essentials Key Stage 2

Key Stage

2

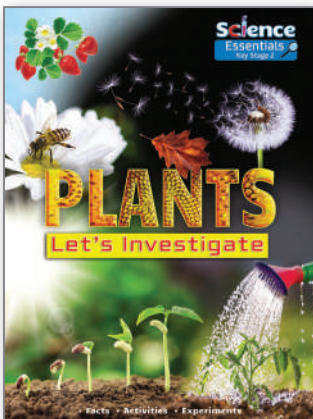

This new 10-book series from Ruby Tuesday Books covers the entire programme of study for science at Key Stage 2.

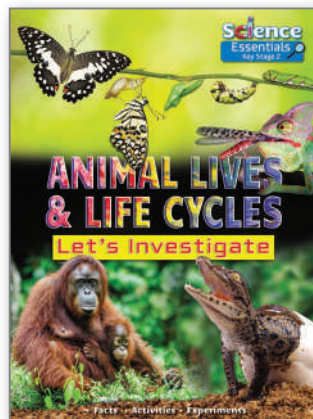

- Experiments and investigations
- Discussion topics & critical thinking questions
- Brings STEM to life for young students
- Beautiful images and a high impact design

### Specifications:

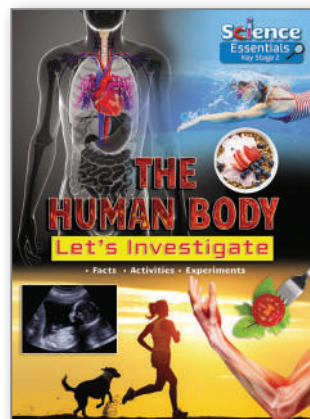

- Ages: 7+ years
- Size: 280 x 210 mm
- Pages: 32
- Format: Pbk
- Pbk: £8.99
- Curriculum Links: Science, STEM, Maths and Non-fiction reading

978-1-78856-043-6

978-1-78856-044-3

978-1-78856-045-0

### Each book gives students the chance to work scientifically:

- Ask questions and use scientific enquiries and evidence to answer them
- Set up simple practical enquiries and tests
- Make observations, take measurements, use scientific equipment
- Gather, record, classify and present data using scientific language, drawings, labelled diagrams and charts
- Use results to draw conclusions, make predictions and ask new questions

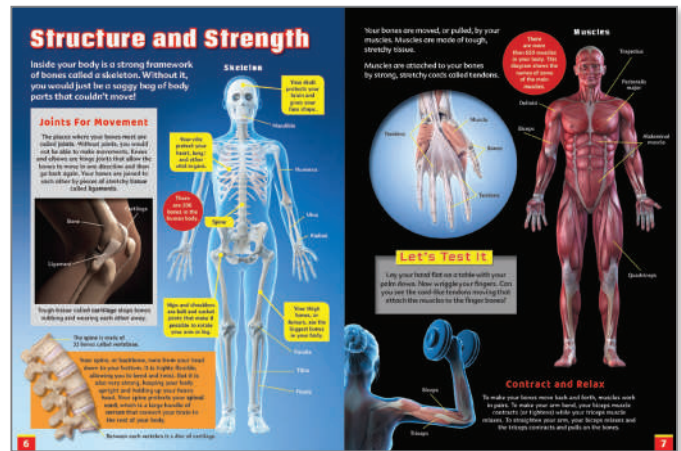

The series is supported with free downloadable teacher resources and worksheets.

# Making Sense of CLIMATE CHANGE

• Know Your Facts • Understand the Science • What Can We Do?

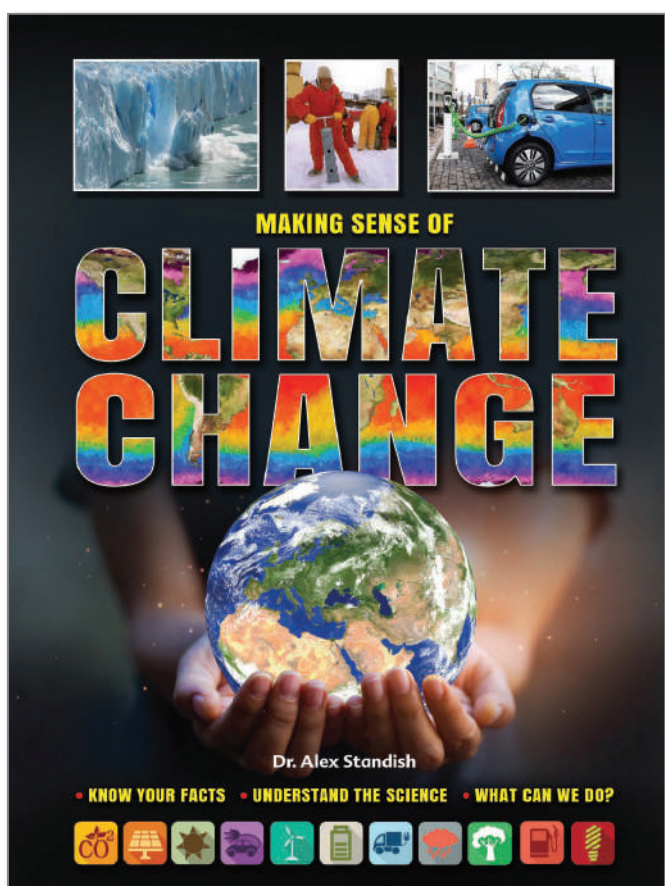

by Dr Alex Standish

Senior Lecturer in Geography Education  
University College London

Age Range

8-12  
YEARS

There's no Planet B, climate change is happening and no one is more ready to tackle this issue than kids. But in recent times, discussion of climate change and its effects has begun to cause fear and anxiety in many young people. This new book by Dr Alex Standish gives an evidence based, informative and calm overview of what's happened in Earth's past, what's happening now, what could happen in the future and what kids, adults and governments worldwide can do to help protect our planet from the effects of climate change. Lots of facts, lots of science, lots of tips and ideas to help everyone make sense of climate change!

978-1-78856-167-9

## Specifications:

- Ages: 8 + years
- Size: 280 x 210 mm
- Pages: 32
- Format: Pbk
- Pbk: £8.99
- Curriculum Links: Key Stage 2, Science, STEM, Non-fiction reading

## Inside the book:

- What is the atmosphere?
- What is climate and how is it different from weather?
- Earth's changing climate: ice ages, thaws and warmer times
- How is the climate changing now and what are its effects on Earth?
- How have human actions affected Earth's climate?
- How do we know? Climate scientists at work.

## Get to Work with Science and Technology

Key Stage

2

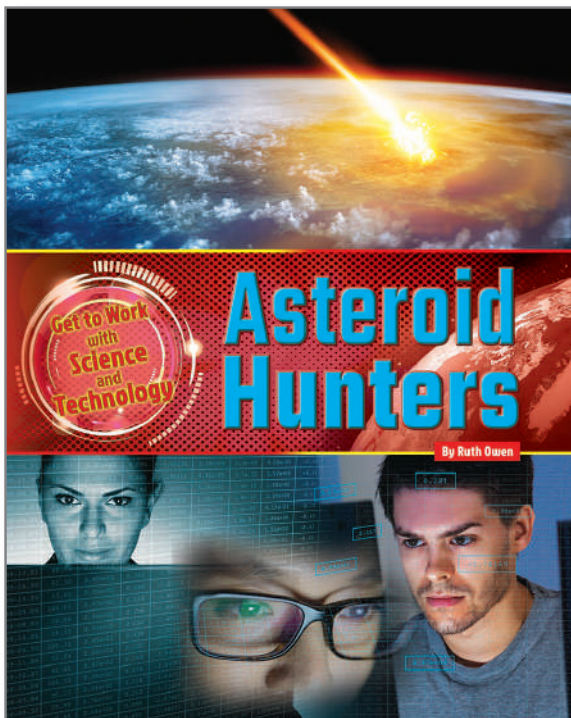

Get to Work with Science and Technology is a fascinating new narrative non-fiction series that introduces readers to the real-world applications of STEM: Science, Technology, Engineering and Maths.

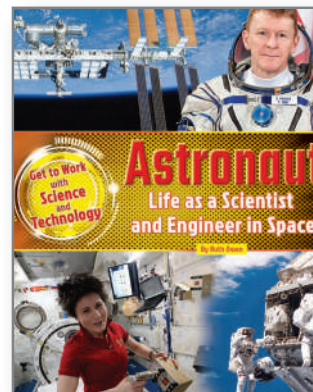

From analysing data to using tools and technology, readers will be excited to see how real-life scientists and engineers solve problems every day using the same scientific techniques that children study and use in the classroom.

### Specifications:

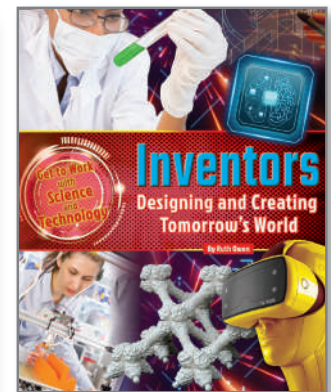

- Ages: 8–12 years
- Size: 254 x 203 mm
- Pages: 32
- Format:  
Pbk: UK edition £8.99

# Books to spark a love of reading and discovery

From Book 1: The Room

From Book 2: Shadows

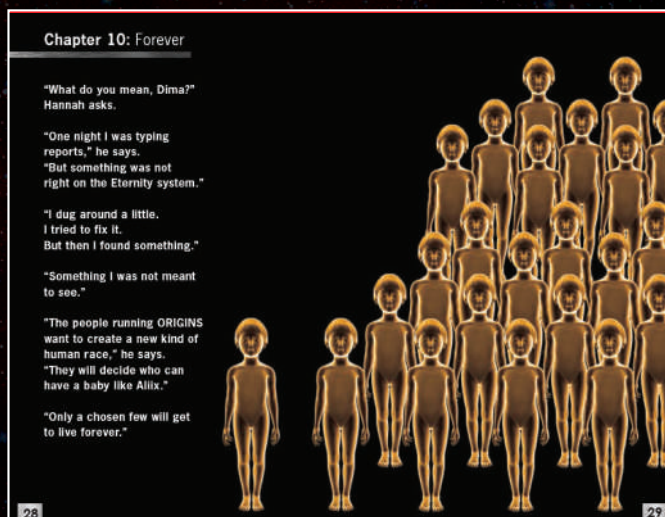

A secret project to combine human and extra-terrestrial DNA. Two teenage siblings, Aliix and Hannah. A childhood (which has been wiped from their memories) spent in a mysterious laboratory. And a fight to save Aliix's life and escape their past.

This innovative concept tells an exciting, sophisticated, Young Adult, science-fiction story across six books. Each book provides a satisfying instalment (or episode) that leaves the reader with some questions unanswered and a nail-biting cliffhanger. Centauri is set in the UK in the present time. The terror and tension is amplified because it takes place in a world we think we know and can trust. . . .

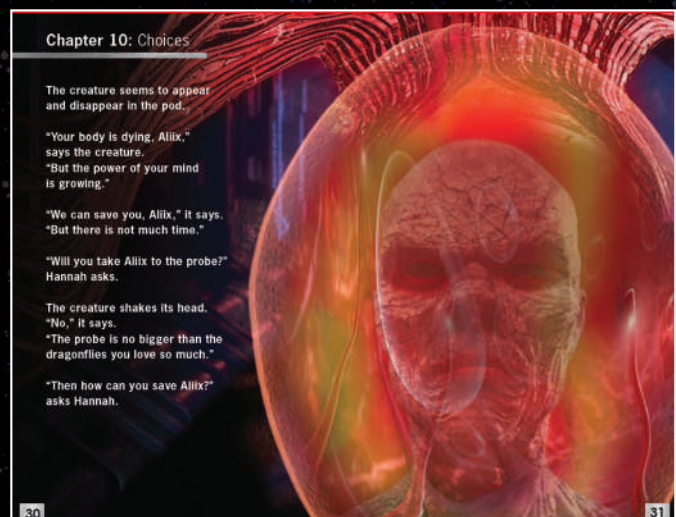

We all know that feeling of finishing one episode in a box set and not being able to resist watching the next. The Centauri books capture that excitement for readers. The books are available in a fantastic slip case that perfectly recreates the excitement and anticipation of opening a traditional TV box set.

## Specifications:

- Reading age: 7-8 years
- Interest age: 12 years +
- Pages : 48
- Size : 198 x 130 mm
- Format: Pbk
